

We are pleased to announce an addition to our award winning range of outdoor heaters. This 4.5KW short wave infrared heater has been developed to meet the requirements of today's needs for outdoor heating. The heater is weatherproof and is suitable to be used outdoors in any application; it is perfectly safe to be used in the rain and continues to work even when subject to intense water jets.

The heater uses a patented quartz gold coated lamp to deliver high energy instant heat. Unlike other outdoor products this heater has very low glare and users feel warm and comfortable from switch – on.

The heater has a very good heat “footprint”- see over, whilst retaining compact dimensions to give opportunity for many different applications.

The heater combines a robust character with excellent design, making the product ideal for both commercial and domestic applications. For safety the heater is fitted with attractive stainless finger guards for increased heat output compared with glass fronted models. The lamps are replaceable.

The heater can be controlled with dimmers, timers or PIR's. Please ask for details.

# **(V) VICTORY** HEATING SOLUTIONS

## Why should I choose a Victory Infrared Heater?

**Safe...**No worries about pressurized gas or storing cylinders and unlike gas no annual servicing.

**Silent...**It's electric!

**Clean...**No smells and virtually maintenance-free

**Compact...**Clean and easy to store

**Effective...**Infrared warms instantly, giving a feeling of comfort from the moment it's switched on.

**Efficient...**Infrared warms the surfaces that it meets not the air – unaffected by draughts.

**Economical...**Low running costs – calculated at just 12p pence per KW hour. Approximately one third the cost of gas heating.

**Experience...**We have been manufacturing Infrared lamps for over 25 years.
